RE: Team Leader Notification, Request for Work Plan
Denbury Onshore Salt Water PL release; AI # 186776; RCAT # 2694
(2nd Spring 2013 Salt Water PL release)
Off LA Hwy. 132 including Muddy Slough area
Dunn, Richland Parish, LA

Dear Mr. Carter:

I have been designated as Team Leader for your facility. I will be your single point of contact with the Department for all remediation-related activities dealing with soil and/or groundwater issues through investigation, risk evaluation, corrective action and corrective action monitoring.

The Louisiana Department of Environmental Quality – Underground Storage Tank and Remediation Division (LDEQ – USTRD) has completed a preliminary inspection of this release. Based on this inspection and the preliminary sampling results it will be necessary to define the vertical and horizontal extent of constituents of concern so that an appropriate evaluation of the situation may be performed. You shall submit an Investigation Work Plan to the Underground Storage Tank and Remediation Division within (60) days of the receipt of this letter. This investigation work plan shall meet all requirements of LAC 33:I Chapter 13 Section 2.3 (Risk Evaluation/Corrective Action Program [RECAP]). Please contact me at least (5) business days before any additional sampling or excavation activities occur.

Mr. Carter

Your facility has been assigned an internal tracking number which needs to appear on all correspondence submitted to the Department. This Agency Interest (AI) number for your facility is **186776**. Please direct all future correspondence regarding remediation issues in triplicate to:

Thomas F. Harris, Administrator
Underground Storage Tank and Remediation Division
P. O. Box 4312
Baton Rouge, LA 70821-4312

I will be contacting you in the near future to discuss the status of your facility and to prioritize any outstanding issues you may have with the Department. It is my intent to make this transition as smooth as possible. In the interim, should you have any questions concerning this matter, contact me at 318.362.0451.

Sincerely,

Stephen Brown
Environmental Scientist
Underground Storage Tank and Remediation Division

srb
